

PROGRAM BUILDER

US RUGBY PLAYERS | PLAYER GUIDE

ST PERFORMANCE

STPERFORMANCEGLOBAL.GITHUB.IO/ST-PERFORMANCE-GLOBAL

The Program Builder creates a complete strength and conditioning program built around your training days, your equipment and your goal for the block. It runs in your web browser, it works on a phone or a laptop, and everything you build stays on your own device. Nothing is shared, and nobody else sees your program.

WHERE THIS FITS

This is designed to help you close the preparation gap when you are in between the programs allocated by your team. It is not a replacement for their programming. Keep communicating openly with your S&C coaches about what you have been doing, so the transition back into their program is smooth when they pick your training and preparation back up.

TWO WAYS TO GET YOUR PROGRAM

PATHWAY 1

BUILD IT YOURSELF

Open the site, work through the options, and press Build. You get a full program in under five minutes, then save it and follow it.

BEST IF you know your training days, the gym you have access to, and roughly what you want out of this block.

PATHWAY 2

BOOK A CALL

Step through it together on a phone or video call. We choose the settings as we talk, and it saves to your device at the end.

BEST IF you are coming back from injury, in season, unsure which focus fits, or you just want a second opinion first.

PATHWAY 1 — BUILD IT YOURSELF

OPEN stperformanceglobal.github.io/usrugby-players-programmer

1 OPEN THE LINK

Works in any browser on phone, tablet or laptop. Nothing to install, no login, no account.

2 ADD IT TO YOUR HOME SCREEN

Do this first. **iPhone:** Share button, then Add to Home Screen.

Android: browser menu, then Add to Home screen. It becomes one tap away and it protects your saved program.

3 SET YOUR LIFTING DAYS

One to five days a week. Be honest about what you will actually hit, not what you hope for.

4 CHOOSE THE BLOCK LENGTH

Four to twelve weeks. Deload weeks are placed for you automatically and shown in the week guide.

5 PICK YOUR FOCUS

Eleven options, from Max Strength and Hypertrophy through to Triphasic, French Contrast and EMOM Density. Each one is explained on screen as you select it.

6 SET EQUIPMENT AND STRUCTURE

Machine, free weight, combination or performance gym. Then lower/upper split, full body, or hybrid, plus body emphasis.

7 ADD THE EXTRAS YOU WANT

Optional toggles for the CARE finisher, Speed, Running Conditioning and Indoor Conditioning. Leave anything off that you do not need.

8 PRESS BUILD PROGRAM

Your full program appears underneath, day by day, with sets, reps, tempo and rest.

9 SWAP ANYTHING YOU CANNOT DO

Tap any exercise name to see the alternatives for that slot. Equipment busy, movement sore, machine missing — swap it and carry on.

10 SAVE IT AND BACK IT UP

See the panel overleaf. This step is the one that matters most.

11 HIDE THE BUILDER

Press **Hide builder** in the top corner. From then on the app opens straight onto your program, with no settings in the way.

12 TRAIN THE BLOCK

Follow the week guide for loading. Come back to **Edit settings** any time you want to change something.

WHAT YOUR PROGRAM INCLUDES

LIFTING

Every session laid out day by day with sets, reps, tempo and rest. Mobility and activation work at the top of each day.

SPEED

Acceleration, max velocity or change of direction, with full run distances and recoveries.

CONDITIONING

RUNNING / OFF FEET

Running work straight line, shuttle or pattern. Off feet sessions by aerobic or anaerobic system.

WEEK GUIDE

What to do each week of the block. Effort levels, load increases, and deload weeks placed automatically.

SAVING AND EXPORTING

Your program lives in your browser on your own device. That is private and it works offline, but it is not permanent storage. Do all three of these once, at the end of your build, and your program is safe no matter what happens to your phone.

BUTTON	WHAT IT GIVES YOU	WHY YOU WANT IT
Save	A small program file to your device	The full backup. If you change phone or lose the program, press Load and pick this file — everything comes back exactly as it was.
PDF: Program	A clean printable program	Print it for the gym bag or the fridge. Works with no phone, no signal and no battery.
PDF + Recording	The program with blank weight columns	Same sheet, with space to write in what you actually lifted each session.
Fillable PDF	A PDF you can type into	Keep your training log on your phone or laptop instead of on paper.
Library	The full exercise reference	Every exercise, running block and conditioning session the builder can prescribe, with the reasoning behind each.

HOW LONG DOES IT STAY ON MY DEVICE?

- **While you keep training, it stays.** Every time you open the app the clock resets. Train two or three times a week and you will never lose it.
- **Long gaps are the risk.** If you go roughly a week or more without opening it at all, some phones clear the stored program to free up space. This is your phone housekeeping, not the app failing.
- **Adding it to your home screen helps.** It is treated more like an installed app and is far less likely to be cleared.
- **Clearing your browser data will wipe it.** So will using a different phone, or a private browsing window.

IF YOUR PROGRAM DISAPPEARS

Do not rebuild it from scratch. Open the app, press **Load**, and choose the file you saved. Your program returns exactly as it was, mid-block, with your settings intact.

If you never saved a file, your printed PDF has everything you need to keep training while you rebuild it.

THE THIRTY SECOND HABIT

At the end of every build, or any time you change your program: press **Save**, then **PDF: Program**. That is it. Two taps and the block is protected.

PATHWAY 2 — BOOK A PROGRAMMING CALL

If you would rather not choose the settings on your own, book a call and we will go through it together. Bring your training days, the gym you have access to, any injuries or restrictions, and what you want out of the next block. We build it live, you save it to your own device at the end, and you leave the call with the program already on your phone.

BOOK A CALL stperformanceglobalconsulting.as.me

WHAT TO HAVE READY

- Days per week you can realistically train
- What equipment your gym actually has
- Any injuries, restrictions or sore joints
- Where you are in your season
- Your phone or laptop, with the site open

COME BACK ANY TIME

- Finished a block and want the next one
- Picked up a knock and need it adjusted
- Changed gym or lost equipment access
- Not sure whether to push on or deload
- Want your numbers reviewed before you progress
